1. Make an account on Uploading.com. It doesn't require any

payments.

2. Go to Pornbb.org, find many clips and movies. It would be great if you downloaded big files. (500mb+)
3. Split the big files with Hjsplit:
<http://www.freebyte.com/hjsplit/>
4. Now upload the videos in parts on uploading.com
5. Spam your download links with pictures from the clip or movie on porn or warez forums.

I've made much money following this guide. Uploading 100 movies/day like me, and you will see results.

If you want to generate some thumbnails from your movie use the program called bsplayer. it's a great program for screenshots.

I'll hope this guide will bring you a stable and secure income every day, every month, every year.
